GARDEN DESIGN

Barry Holdsworth

Design and Consultancy

Award winning reputation

Barry translates his passion for design, planting and the landscape into fresh, imaginative designs that you will enjoy for years to come. His gardens have won awards for innovative design and specialist planting, including a medal at Chelsea Flower Show and reviews in Country Life and The Telegraph.

Design projects range from the contemporary to the traditional, from the intimate spaces of a city garden to a stunning 70 acre landscaped garden on a country estate.

New gardens are designed to create a perfect balance between a property's architectural features and its natural surroundings. Whilst older gardens can be restored to their original beauty by renovating glasshouses, rebuilding walled gardens and renewing historic planting schemes. Water features and sculptures add contrast and depth, whilst lakes and wildflower gardens add grandeur and colour to a landscape.

With over 20 years experience, Barry brings a wealth of knowledge in design, landscaping and planting to create a garden unique to you.

Specialist services

Barry offers a full range of services on all aspects of the garden. Including all landscaping work, advice on planning permission, tree surveys, organic methods and green technology.

During design and construction projects, he liaises with architects, planning departments, construction and environmental professionals for a satisfactory outcome.

To gain long lasting enjoyment from your garden, the very best in planting, materials and craftsmanship are sourced from handpicked specialist providers.

Personalised approach

Barry works closely with you from the start. He'll create a package that is carefully tailored to your needs, budget and timescales.

He personally oversees each stage of a project, keeping you fully informed every step of the way from the groundwork and construction through to the final planting.

Expert plantsman

Barry's intimate knowledge of planting truly complements his talent for design. He will create the perfect planting scheme for your garden.

Low maintenance planting for a busy lifestyle, colourfully stocked flower beds for a traditional garden and exotic plants for dramatic impact in a city garden or rooftop patio.

For the kitchen garden, he offers expert advice on culinary and organic planting to give you the enjoyment of tasty food grown in a sustainable, eco-friendly environment.

For growing under glass, Barry will create the perfect environment for your indoor garden. He can advise on the best site for your glasshouse, the ventilation and heating systems you need, and the types of plants that thrive under glass.

'A place of excellence, tranquility and tradition'
The Times Weekend

'The planting is subtle and tasteful'
The English Garden

'I was impressed by the care and attention Barry gave to every stage of this project'

Hon. Mrs M Williams, Aberdeenshire
